THE

SOLUTION

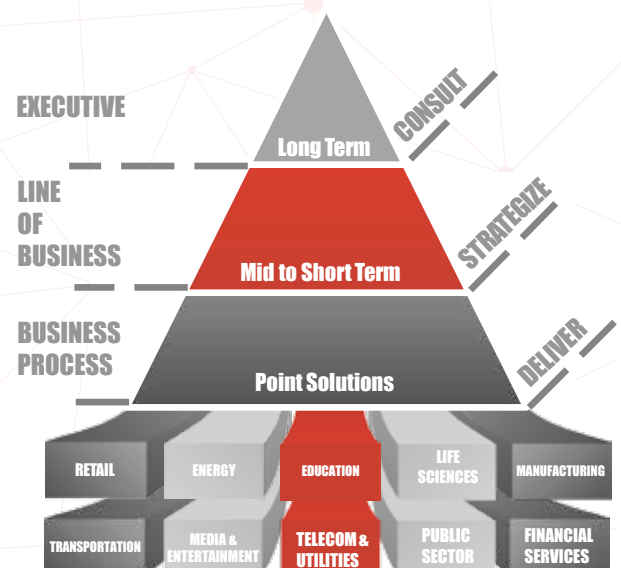

Who We Are

BuzzClan is an elite business consulting firm collaborating to provide IT consulting, advisory, implementation and managed services across platforms and skills. We have invested in building a mature services practice that is OEM agnostic & focusses on choosing the right solution for your success.

- Certified Reseller for most reputed & Infrastructure application vendors
- Vertical driven expertise with teams focussed on Federal to Small enterprise businesses
- Expert teams who take complete ownership of the solution across the stack
- OEM certified consultants and PMP certified program delivery professionals
- Onsite presence at various locations across The US & Canada
- Near-Shore & Off-Shore presence for optimum delivery
- Private Cloud, hosted In-house to provide POV Workshops, Development, Test and Training Environments for clients
- Solution Centres in Dallas(TX), Nairobi(Kenya), Toronto(Canada), Mohali(India) Gurgaon(India)

BuzzVANTAGE

BuzzClan's offerings in IT solutions are uniquely positioned to serve organisations across verticals and suit various strategic and tactical initiatives. For instance, at a business process level we can provide point solutions such as lift and shift to cloud, disaster recovery and migrations. We are equally capable of handling long term larger impact initiatives like business consulting and digital transformation.

Practice Areas

Technology Infrastructure Services

BuzzClan has invested time & resources to develop capabilities around various deployment scenarios like public & hybrid cloud. This enables us to deliver higher 'Return on Investment' & 'Low Cost of Ownership' across all class of infrastructure applications.

Integration Services

- > Deployment
- > Backup & DR
- > Performance Tuning
- > Migration & Updates
- > Infrastructure as a Service

Consulting & Support

- > Infrastructure Consulting
- > Monitoring & Business Continuity
- > Staff Augmentation

Business Intelligence & Analytics

Business Analytics is one of the key areas where BuzzClan holds expertise across verticals and lines of businesses. While we can setup robust acquisition and reporting structures, we can also rescue existing BI implementations from dire straits, improve performance, simplifying architecture and modelling complexity.

Integration Services

- > Implementation
- > Performance Tuning

Consulting & Support

- > Business Consulting
- > Monitoring & Business Continuity
- > Staff Augmentation

Business Application Services

BuzzClan is your trusted application services partner, that provides reliable management of the entire enterprise application portfolio. We deliver reliable, secure applications that streamline processes, improve efficiencies and provide a superior user experience. While we own the SLA's, business owners are free to dedicate time and resources on their core expertise.

Integration Services

- > Implementation
- > Customisation Installation/Configuration Migration/Upgrades Security
- > Lift & shift to cloud

Consulting & Support

- > Functional Consulting Technical Consulting
- > Monitoring & Business Continuity
- > Staff Augmentation

Cyber Security & Enterprise Risk

An unplugged leakage is a high potential risk that could cost an enterprise greatly. We have constantly worked towards developing various robust applications that are based on compliance frameworks and reduce risk exposure for organisations.

Data Security & Compliance

- > Identify, Classify and Protect Assets
- > Control Access - Separation of Duties
- > Data Masking and Redacting
- > Hardening at Various Levels
- > Audit and Monitoring Access
- > HIPPA & PCI
- > Audit & Benchmarking

Identity Management & Authentication Services

- > Multi-Tenancy Security - Private and Public Cloud
- > Access Management
- > Directory Services Governance
- > Mobile Security

Cloud Enablement Services

To ensure an agile and growth-oriented organization, migrating to the cloud frees your teams from the infrastructure maintenance tasks, allowing them to focus on the cutting-edge innovation. From migration of Cloud-Native Database, vertical and horizontal scalable API-led middleware, SaaS based application platforms to application modernization, BuzzClan can help you maximize the value of cloud-first transformations.

Strategy

- Determine Cloud Needs
